

# ABHISHEK SAWANT

## React.js Developer | Frontend Engineer

Pune, India • +91-8767570884 • abhisheksawant732003@gmail.com • linkedin.com/in/abhishek-dhanaji-sawant-933639241

### PROFESSIONAL SUMMARY

Results-driven **React.js Developer** with **1+ year of experience** building high-performance, scalable frontend applications for clinical data platforms in the pharmaceutical domain. Proficient in **React Hooks, Redux, TypeScript, Ag-Grid, REST API integration, and Webpack optimization**. Recognized with the **Q1 2026 Spot Award for Best Performance** in the UI team. Proven track record of delivering complex UI features and resolving high-priority production issues for global pharma clients including **Pfizer** and **Jazz Pharma**.

### KEY ACHIEVEMENT

#### ■ Spot Award — Best Performance, UI Team | Q1 2026 | Saama Technologies

- Recognized for consistently delivering multiple user stories within sprint deadlines across production releases.
- Reduced application bundle size through advanced **Webpack code-splitting** and asset optimization, improving load performance.
- Resolved multiple **urgent production bugs** impacting Pfizer and Jazz Pharma clinical trial workflows with zero regressions.
- Demonstrated full ownership across the UI development lifecycle — from feature design to deployment and hotfix resolution.

### TECHNICAL SKILLS

**Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, React Hooks, Redux, Node.js, Express.js

**UI Libraries & Styling:** Material UI, Tailwind CSS, Bootstrap, Ag-Grid React, HTML5, CSS3, Responsive Design

**Performance & Tooling:** Webpack (code-splitting, tree-shaking), Git, GitHub, REST APIs, CI/CD basics

**Testing & Methodology:** Jest (unit testing), Agile/Scrum, Code Reviews, Cross-browser Compatibility

**Databases:** MySQL, PostgreSQL, MongoDB

### PROFESSIONAL EXPERIENCE

**Associate Software Engineer | Saama Technologies Pvt. Ltd.** Pune, India

Oct 2025 – Present

*Tech Stack: JavaScript (ES6+), TypeScript, React.js, React Hooks, Redux, Material UI, Ag-Grid, Webpack, REST API, Git*

- Architecting and maintaining the frontend of **SIGMA/Brain**, a clinical data platform serving global pharma clients including **Pfizer** and **Jazz Pharma**.
- Engineered complex React components using Hooks (**useState, useEffect, useMemo, useCallback**) for the Specifications Module, enabling statistical programmers to define SDTM and ADaM data transformation rules.
- Built highly interactive dashboards using **Ag-Grid React** to manage large-scale clinical datasets, maintaining **60fps performance** during filtering and sorting operations.
- Implemented robust **Redux**-based global state management to synchronize patient data across Phase I–IV clinical trials and medication groups.
- Delivered **7+ major user stories** involving complex UI logic for clinical trial phase management and data validation workflows.
- Resolved **50+ high-priority production bug tickets**, including urgent issues impacting Pfizer and Jazz Pharma clinical trial submission timelines.
- Architected **Webpack configuration** with code-splitting and asset optimization, reducing initial bundle size and significantly improving application load performance.

- Collaborated in **Agile/Scrum** sprints — daily standups, sprint planning, and rigorous peer code reviews.

**Trainee – Frontend Dev** | [Saama Technologies Pvt. Ltd.](#) Pune, India

Mar 2025 – Sep 2025

*Tech Stack: JavaScript, HTML5, CSS3, React.js, React Hooks, Material UI, Redux, Git*

- Built reusable **React functional components** using Hooks to refactor legacy code, improving maintainability, readability, and component reusability.
- Collaborated with UX designers to translate **Figma wireframes** into responsive, pixel-perfect interfaces using Material UI, ensuring cross-browser compatibility.
- Integrated **REST APIs** to dynamically fetch and display real-time data, implementing loading states and error boundary handling.
- Participated in rigorous **code reviews** and maintained high coding standards using Git-based version control (branching, PRs, merge strategies).

## KEY PROJECT

---

**SIGMA/Brain** — Clinical Trial Lifecycle Automation Platform | Saama Technologies

- Developed end-to-end UI features for tracking medication vs. placebo groups across **Phase I–IV clinical trials** for large-scale pharmaceutical research clients.
- Integrated REST APIs to dynamically fetch and display real-time clinical trial data and account-level specifications with optimized re-render performance.
- Owned the complete clinical data pipeline UI — from raw data capture to **regulatory-ready SDTM/ADaM submission formats**, ensuring compliance-ready output.
- Implemented responsive, accessible UI components with Material UI and Ag-Grid React, handling **10,000+ row datasets** without performance degradation.

## EDUCATION

---

**Bachelor of Engineering — Computer Engineering**

Graduated: 2025

International Institute of Information Technology (I<sup>2</sup>IT), Pune, India
